

TRANS-FIL INDUSTRIAL EQUIPMENT

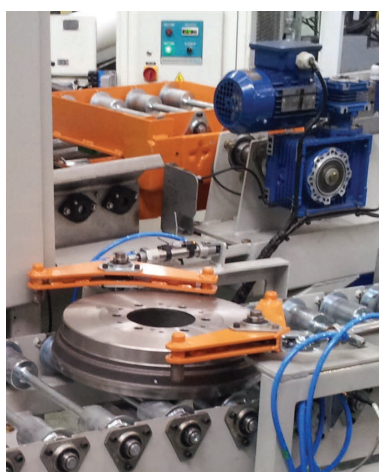

Your Trusted Partner
in Washing Solutions

Leveraging decades of experience, we specialize in delivering state-of-the-art continuous-washing machinery solutions.

Our dedication to innovation ensures that our automated washing solutions meet the rigorous standards of the automotive and metallurgical industries.

Discover the difference with our automated washing machines:

Customized Design:

Our solutions are tailored according to your needs to increase your process efficiency.

Automation:

We optimize your operation and supervision, reducing manual intervention and improving efficiency.

Cost reduction:

We eliminate impurities and waste efficiently, reducing operative costs and respecting process parameters.

Quality:

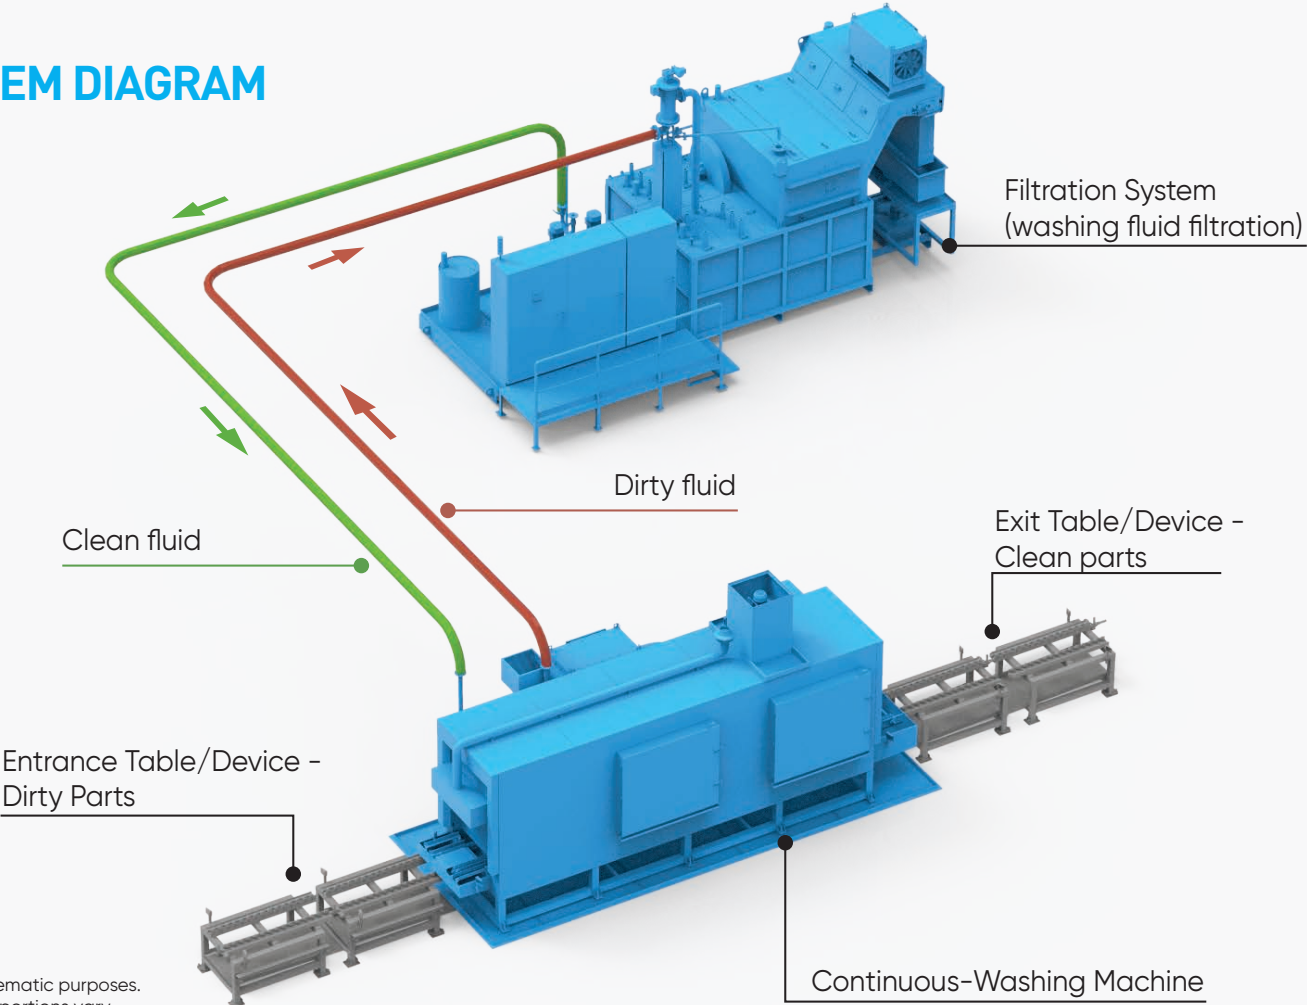

We guarantee exceptional quality in your finished products, meeting rigorous industrial standards.

Continuous-Washing Machinery.

In the continuous-washing machinery field, we are recognized as the premier partner for major automotive and metallurgical enterprises worldwide, including notable collaborations with industry leaders such as Toyota and Volkswagen. Our equipment manages fluids across varying temperature ranges to ensure maximum efficiency. Additionally, our specialization lies in designing and adapting transport mechanisms and part placement to meet the rigorous time and quality standards demanded by the industry.

TRANS-FIL, your Trusted Partner in Continuous-Washing Machinery. From planning to setup, we deliver comprehensive solutions tailored to your needs.

TRANS-FIL CONTINUOUS-WASHING MACHINERY

TUNNEL	CABIN	TOWER	SPECIAL
Allow for a high variety of parts.		Flat parts.	Parts with very unique characteristics.
E.g.: gears, pistons, etc.		E.g.: gears, crowns, etc	E.g.: motor blocks, complex assemblies, delicate components.

WORKING SCHEMATICS

Elevating Quality: The Critical Role of Effective Parts Washing.

In demanding production environments, such as automotive part manufacturing, our industrial washing machines excel at removing impurities such as oils, fats, metallic residues, and abrasive particles.

Our commitment to meticulous washing processes directly enhances the quality excellence of the final product.

Trust in TRANS-FIL continuous-washing technologies to ensure seamless operations and maintain your components in optimal condition without setbacks.

At TRANS-FIL,
we deeply value the enduring partnerships we've
built with our clients. We're proud to count esteemed
organizations among those who trust our washing
machinery solutions.
